PNEUMATIC TUBE SYSTEMS

Atreo Pneumatic Intelligence

Atreo provides healthcare facilities with the **Aerocom Pneumatic Tube System** specifically designed for the safe, secure, reliable and rapid transport of critical care items. Atreo understands how much these systems impact the ability of caregivers to be responsive when seconds really matter, and delivers best-in-class technology for the healthcare environment along with superb customer support.

- **Reduce Wait Time:** pass-through design makes all the difference – shorter travel distances, less pipes and diverters, fewer penetrations.
- **Save Ceiling Space:** pass-through design, compact inter-zone exchange, 36” bends – all sum up to a huge saving in space, particularly in the ceilings.
- **Make it Quiet:** stations, blowers and other components substantially quieter than any others.
- **Leak Proof:** carrier design prevents spills into the pipe network and stations.

SERVICE AND SUPPORT

Atreo provides world-class service and support

- Corrective, preventive, and predictive maintenance programs
- System conversions to boost performance with our unique advantages
