## PNEUMATIC WASTE & LINEN

### Atreo Pneumatic Intelligence

Make a difference with **TransVac** automated waste and linen collection systems. A huge betterment over the antiquated use of carts and notorious gravity chutes, as well as over AGVs, you can avoid elevator and corridor congestion, reduce infection risks and operating costs.

- **Prevent Infection:** reduce exposure to infectious materials by 80% with a sealed, dedicated pipe network from patient floors to a centralized collection location.
- **Increase Efficiency:** waste, recycling and soiled linen are transported at 50 miles per hour to their appropriate containers
- **Save Precious Space:** consolidate dock areas, and reduce size of soiled rooms.

Atreo has over 50 years of experience dedicated to healthcare with superb customer support and highly skilled project management success.
